

# Food Rescue

Throwing away food is like stealing from the table of those who are poor and hungry.

~pope francis

# TABLE OF CONTENTS

**01**

**INTRODUCTION**

**02**

**PROBLEM & SOLUTION**

**03**

**ANALYSIS**

**04**

**CONCLUSION**

01

# SECTION A

## Problem statement

# OUR ORGANISATION

## VISION

to reduce food waste by  
bringing awareness about food  
waste among community and  
kids

## MISSION

to bring balance in our local  
community using existing  
discarded waste to create a  
clean, peaceful and healthy  
environment.

# OUR PLANS

## STEP 1

Problem identification

## STEP 2

Determine Root Causes

## STEP 3

Rank Root Causes in Order of Importance.

## STEP 4

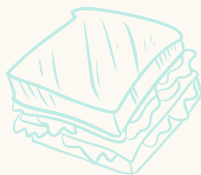

Create an Action Plan.

# SOLUTION

**Source reduction**  
**Human consumption**  
**Feeding animals**  
**Industrial uses**  
**Composting**

02

## SECTION B

Problem and solution

# PRODUCT OVERVIEW

F O O D  
R E S C U E

The recovered food is edible, but often not sellable. In the case of fresh produce, fruits and vegetables that do not meet cosmetic standards for shape and color might otherwise be discarded. Products that are at or past their "[sell by](#)" dates or are imperfect in any way such as a bruised apple or day-old bread are donated by grocery stores, food vendors, restaurants, and [farmers markets](#)

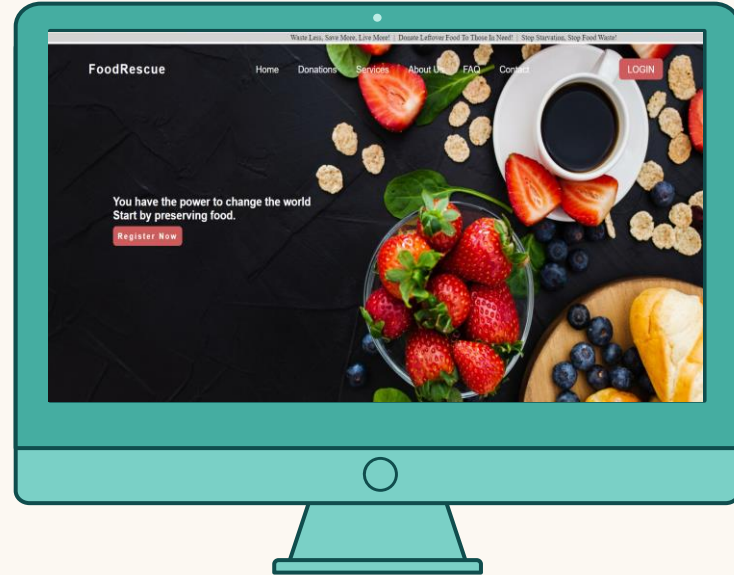

# PRODUCT DEMO

## Food rescue

**Food rescue**, also called **food recovery**, **food salvage** or **surplus food redistribution**, is the practice of gleaning edible food that would otherwise go to waste from places such as farms, produce markets, grocery stores, restaurants, or dining facilities and distributing it to local emergency food programs

## PROBLEM

if food goes to the landfill and rots, it produces methane—a greenhouse gas even more potent than carbon dioxide.

# THEM VS US

## THEM

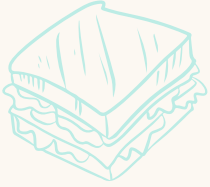

After landfilling, it produce methane gas which is very harmful for environment.

## US

We will not fill the land or less use.

# SWOT ANALYSIS

## OPPORTUNITY

To maintain the food level  
and reduce the wastage.

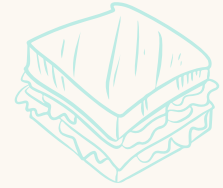

## THREATS

The waste should not affect  
the environment

# Graphs: example in BRITAIN

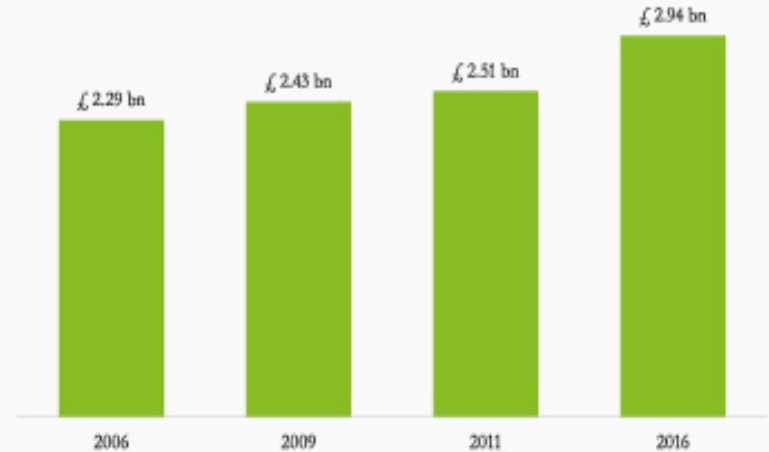

- Earlier

- now

## How much does food waste cost Britain each year?

Estimated total cost of food waste in the UK from 2006 to 2016\*

# PREDICTED GROWTH

Food Waste Management Market Size, 2022-2032

**CAGR  
6.50%**

source: [www.reportsanddata.com](http://www.reportsanddata.com)

**Predicted growth will  
increase enormously.**
